Removable Window Bars

award-winning removable security bars

Ideal for domestic and commercial applications where removal of the window bars is required occasionally.

The award-winning removable window bar system features anti-cut steel window bars which are securely locked into position to protect vulnerable window openings, but can be released from the inside to allow total vision or maintenance of windows.

Suitable for installation in a horizontal or vertical format, the window security bars are finished to a high standard and delivers security which is quick and easy to install, yet highly effective in a range of locations.

Easy to install, the window bar system is designed to fit as close as possible to the window frame, which will avoid any cavity for dust and dirt to collect in. It is also operated by a single radial lock point.

A higher security fixed window bar system is also available for locations where removal is not a requirement.

The removable window bar system is ideal for lower security, domestic and commercial applications where removal of the window bars is required.

product specification

Min Width:	250mm x 200mm
Max Width x Height:	3000mm x 2100mm
