

FIXED BARS

Fixed Window Bars are a traditional, high protection solution to window security. Fitted internally or externally, horizontally or vertically, they provide a strong, durable deterrent to would-be thieves.

- When fitted internally, the windows can still be opened, allowing ventilation without compromising the security of a property.
- The appearance of fixed bars provides an instant deterrent to potential vandals or thieves. When externally fitted, it reduces the risk of window breakage.
- The bars are manufactured from high quality steel and supplied in white as standard, but can be powder coated in a wide range of RAL colours as required.

APPLICATION

- Fixed window bars are bespoke manufactured for use as a fixed security grille in domestic, commercial and industrial applications.
- Bespoke manufacturing allows various designs and fixing solutions to overcome specific design needs.

SPECIFICATION

- Manufactured in solid steel, the bars are fully welded and spaced at a maximum of 125mm centre to centre, with horizontal tie bars at 450mm intervals, providing the best possible strength.
- Available in different thicknesses of 12, 16, 20 and 25mm.
- Guaranteed for a period of 12 months from date of purchase.
- Custom and decorative bars available.
