

REMOVABLE WINDOW BARS

Removable window bars are the ideal solution for domestic and commercial applications where removal of the security bars is occasionally required.

- Manufactured from powder coated anti-cut steel bars that can be fitted vertically or horizontally for internal fitting.
- The window bars are locked into place on the inside of windows using strong extruded aluminium retaining units, yet can be easily released from the inside to allow easy access for maintenance and visibility.
- Supplied in white as standard, but can be powder coated in a range of RAL colours as required.
- Operated by a single radial lock point in which the key must be inserted into the lock before any bar rotation is possible. This unique locking system allows bars to be simultaneously released in seconds.

APPLICATION

- Removable window bars are designed for use in both domestic and commercial properties who need high quality security that can be removed as and when required to improve aesthetics.

SPECIFICATION

- Each bar consists of a 19mm steel outer tube with a free-moving 15mm steel inner tube.
- The bars are locked into place using a high security 10 pin radial cam-lock with 5 million + key combinations.
- Guaranteed for a period of 12 months from date of purchase.
